## Asus wireless router setup rt-ac68u

Description: This article will show how to complete the basic setup of an ASUS wireless router, including the physical connection and basic wireless setup. The steps and screenshots can be used for most ASUS wireless routers; however the location of physical connections may be different depending on your router's model. The router being used in this guide is the ASUS RT-AC68U. There are 3 cables that will need to be connected: Connect an Ethernet cable from your cable/DSL modem to the WAN port on your ASUS router; labeled with a globe with a ring around it (this port is blue). Connect another Ethernet cable from your computer to any one of the LAN ports on the router; labeled 1, 2, 3, and 4 (these ports are yellow). Finally, connect the power cable to the wall outlet and to the DCIN port on the router (shown in green). Once everything is connected, press the power button on the back of the router (shown in red). Once the router is powered on, open a web browser. The ASUS setup page may automatically open. If so, continue to step 4 of this guide. If not, type 192.168.1.1 in the address bar and then press Enter. If prompted to login to the router, enter admin as both the username and password, and then click OK. The initial setup page will open, click the GO button. Enter the desired username and password for the router administrator in the corresponding boxes, and then click Next. It is highly recommended to change this from the default username and password as this is the information that will be used to access the router's administration settings. The router will detect your internet connection. Depending on your connection type, additional details may need to be entered if required by your Internet Service Provider (ISP). In most cases, the router will detect the connection automatically and continue. Enter the desired network name (SSID) and network key (password) into the corresponding boxes, and then click Apply. A configuration summary will appear, showing the new settings. Click the Next button. A login prompt will appear. Enter the credentials that were entered earlier in step 5 and click OK. The settings page for the router will open. Click the Logout button at the top of the page to logout of the router's settings. Click OK on the confirmation box to logout. Setup is now complete. Free technical support is available for your desktops, laptops, printers, software usage and more, via our new community forum, where our tech support staff, or the Micro Center Community will be happy to answer your questions online. Todos los derechos reservados. view on your table View the model in 3D Awards Media reviews RT-AC68U supports combined dual-band data rates of up to 1900Mbps. 1300 Mbps 802.11ac at 5 GHz gives Gigabit wireless data rates, while Broadcom® TurboQAM™ technology super-charges 2.4 GHz 802.11n performance from 450 Mbps to 600 Mbps with compatible devices. Powered by a dual-core processor, the RT-AC68U eliminates the performance drops that plague other routers with busy networks. So even on the busiest home networks, HD video streaming is always smooth, the latency low for online gaming and VoIP calls, and file downloads are never interrupted. The RT-AC68U also features dual USB ports for file, printers and 3G/4G modems sharing and a USB 3.0 port for up to ten times faster data transfers than USB 2.0. ExclusiveASUS AiCloud transforms your home networking into your personal cloud for easy streaming and sharing to smartphones, PCs, and tablets. Router-to-Router sync also makes it simple to sync files on USB-connected storage with other compatible ASUS routers for hassle-free sharing of large files with family and friends. The easy-to-use ASUSWRT graphical user interface unlocks the power of the RT-AC68U giving robust control to optimize your network for you. 30-second set-up and easy traffic management means even network newbies can enjoy its sophisticated features, while power users will love its IPv6 support, multiple wireless SSIDs and encrypted VPN access. All your family members, young or old, are exposed to the dangers of internet every single moment they're online. Disguised cyber threats can sneak in to steal your private data, or your kids may accidentally encounter inappropriate content during their ever-growing screen time. RT-AC68U includes Advanced Parental Controls to give you total peace of mind, with AiProtection Pro - commercial grade security for your home network and comprehensive, easy control of the online experience for each family member and each device, all via the mobile app. learn more No Subscription Fee Some routers only offer 3 years of protection, ASUS AiProtection has you covered for the life of your product Block Access to Malicious Websites AiProtection uses Trend Micro's official database to identify and block known malicious sites, preventing infection even before you click. Protection Against Attacks Intrusion Prevention System (IPS) blocks all common internet-based attacks. Infection Detection and Blocking Even if an already-infected device is connected to RT-AC68U, AiProtection prevents any personal data on the device from being compromised. Keep your kids safe when they explore the internet. The state-of-the-art parental controls in AiProtection integrate all the management functions you need in one place and the intuitive interface makes it super easy to view and apply security settings to all the devices owned by individual family members.\* View each family member's internet activity on a clear graphical dashboard showing the peak time and what kind of content they are viewing. You can group devices that belong to your children to view aggregated data and apply scheduled block times and content filters with just a few taps. Check the box when editing a device and profile, and the preset automatically applies filters for inappropriate content to all their devices. Reserve valuable family time or help your children develop responsible behavior by selecting scheduled time periods to block internet access on specific devices. Block specific categories of mobile apps and websites, and apply these settings to all devices belonging to individual family members. The advanced filtering integrates Trend Micro's Deep Packet Inspection (DPI) engine to filter not only by website URL, but also by the internet packets themselves, which means it filters content viewed not only in a web browser, but also within mobile apps on your devices.\* Your router is about to have a lot more fun. That's because it can now stream all your favorite PC games to the NVIDIA® SHIELD™ portable to play anywhere in the house using fast, ultra-reliable NVIDIA GameStream™ technology. ASUS routers deliver lag-free, high-performance game streaming from GeForce® GTX™ =powered PCs or NVIDIA GRID™ cloud gaming systems. For more information, visit www.nvidia.com/gamestream. Powered by 5th generation Wi-Fi (5G Wi-Fi), the new 802.11ac chipset gives the RT-AC68U superfast Gigabit wireless speeds. What's more, RT-AC68U uses TurboQAM™ technology to upgrade 2.4G Wi-Fi even further to give you unprecedented speeds. At 2.4 GHz, it's 33% faster than generic wireless-N900 routers, reaching 600 Mbps, while on the 5 GHz band it blazes to 1300 Mbps - or triple 802.11n rates. That's 1900 Mbps of concurrent wireless power! \*To get the best performance, pair RT-AC68U with ASUS PCE-AC68 client card The ASUS RT-AC68U features a dual-core processor that eliminates the performance drops that plague other routers. So even on the busiest home networks, HD video streaming is always smooth, the latency low for online gaming and VoIP calls, and file downloads are never interrupted. ASUS AiRadar intelligently strengthens wireless connectivity using beamforming technology, high power amplification, and exclusive ASUS RF fine-tuning. This ensures extended coverage, dynamic data speed increases, and enhanced stability. In most cases, your RT-AC68U can deliver smooth, reliable Wi-Fi to every part of your home. But Wi-Fi coverage can be affected by many factors — room layout, construction materials, and even furnishings. ASUS AiMesh is an innovative new router feature that fixes these problems: it creates a whole-home Wi-Fi network using multiple ASUS routers. AiMesh is powerful, flexible and you can use a mix of ASUS router models — protecting your investment! AiMesh gives you time-saving central control, and seamless roaming capability. AiMesh is Wi-Fi you can rely on — for all your devices, all the time! Learn More Turn your ASUS routers into whole-home Wi-Fi system with a simple firmware update Mix and match preferred models from selected ASUS routers Create a Wi-Fi network with either a single SSID or multiple SSIDs All router features works across the entire Wi-Fi system Delivering 2.4 GHz and 5 GHz concurrent bands at up to 600 Mbps and 1300 Mbps, respectively, the RT-AC68U has a total speed of up to 1900 Mbps, and maintains complete stability. You can perform basic tasks like Web browsing and file downloading on the 2.4 GHz band, while simultaneously allowing multiple devices to stream in Full HD or support online gaming and other bandwidth-demanding applications smoothly on the clearer 5 GHz band. Highest Speed USB 3.0 features data transfers up ten times faster than USB 2.0. Two USB ports make the RT-AC68U perfect for file, multimedia, and 3G/4G sharing, while ASUS AiDisk offers remote access and quick content streaming. Where other routers have their USB ports sandwiched next to one another, both RT-AC68U USB ports are evenly spaced for easy access to either at all times. With the ASUSWRT dashboard UI, setup, monitor, and control network applications all in one intuitive area. On top of 30-second setup,multi-device detection, and flexible settings that make the most of your network performance, it's been upgraded with quick scanning of USB storage connected to routers to verify data integrity and drive health. Dual WAN enables having two connections/ISPs on one router, with load balance and failover mode for added stability and redundancy to ensure uninterrupted internet access. Do you game a lot, or spend most of your time streaming videos? Whatever your planned use is, the RT-AC68U has Adaptive Quality of Service (QoS) that optimizes inbound and outbound bandwidth on both wired and wireless connections. Applications and tasks can be prioritized easily using drag-and-drop presets for gaming, media streaming, VoIP, web browsing and file transfers. It supports major consoles including PlayStation®3, PlayStation®4, PS4™ Pro, PlayStation®Vita, Wii U, 3DS and Xbox One. Try it. Use your smartphone, tablet, or PC to effortlessly set up your ASUS router in less than 30 seconds\* and in only 3 easy steps! Simply connect the cables to the router, open a Web browser, and follow the setup wizard to get you to the internet in no time. Step1: Open web browser. Step2: Enter ID/Password. Step3: Done! \*ASUS-tested and verified setup time. Actual duration may vary by ISP, specific connection type, location, and other factors. In your increasingly mobile-enabled life, having control over your network via an app is more important than ever. The new ASUS Router App is built from the ground-up to be both intuitive and robust, allowing you to setup your router, manage network traffic, diagnose connection issues and even update firmware, all without needing to boot up a PC. » Learn more Click below to download ASUS AiCloud keeps you connected to your data wherever and whenever you have an internet connection. It links your home network and online Web storage service\* and lets you access it through the AiCloud mobile app on your iOS or Android smartphone or through a personalized URL in a Web browser. Even better, the new Router-to-Router Sync function allows you to synchronize your stuff with storage devices connected to other compatible ASUS routers— it's as simple as choosing a sync folder. Sharing with friends and family is now easier than ever! Learn more. \* Works with select Web storage services only. Support for a massive data pipeline of up to 300,000 data sessions means the RT-AC68U has around 20 times the networking capacity of conventional routers for exceptionally smooth performance\*. \*Result is based on ASUS lab test data. Actual performance may be affected by network and service provider factors, interface type, and other conditions. Download Master and enhanced media server let you download and play multimedia files stored on router-attached USB storage on a wide range of compatible devices such as PC, pad, PS3, Xbox, and smart TV. Download Master can also download files while your PC is turned off, and allows you to manage and monitor download status remotely. Easily set up a VPN server to browse the web and access data with MPPE encryption— no matter where you are. Share your internet connection with your guests with no need to share your personal password or network resources. ASUS Guest Network supports up to three separate guest networks, each with its own usage limits and password. Guests cannot access your primary network or any other connected devices. Via the complimentary single user, one-year pre-paid subscription to FileFlex (\$34.95 value), your ASUS router becomes a 2-way smart hub that enables remote access, sharing and streaming of router-attached USB storage and the storage of the router-networked devices as well as a multi-media hub that automatically backs up and stores photos and videos from smart phones and tablets. Securely access, share and stream router USB attached storage from your remote computers, tablets and smart phones Remotely access, share and stream any device on the router's network Automatically backup your photos and videos from your smart phones and tablets to your own storage Watch the video Learn more Remember to always keep your device's firmware up to date so you can benefit from the very latest service and security enhancements — and get exciting new features! Learn more about updating new firmware. 1. This service is provided by Facebook and is not available in regions without Facebook services.
